Over ThiemeMeulenhoff

ThiemeMeulenhoff ontwikkelt zich van educatieve uitgeverij tot een learning design company. We brengen content, leerontwerp en technologie samen. Met onze groeiende expertise, ervaring en leeroplossingen zijn we een partner voor scholen bij het vernieuwen en verbeteren van onderwijs. Zo kunnen we samen beter recht doen aan de verschillen tussen lerenden en scholen en ervoor zorgen dat leren steeds persoonlijker, effectiever en efficiënter wordt.

Samen leren vernieuwen.

Dit betekent dat de bosbouw op een verantwoorde wijze heeft plaatsgevonden.

Uit ervaring weet ik, dat, als leerlingen in groep 4 de tafels niet goed geleerd hebben, of, wanneer de tafels niet voldoende, of ondoelmatig zijn herhaald in de volgende leerjaren, het tot in groep 7 en groep 8 haspelen blijft. Vandaar deze bescheiden poging, die naast elke methode gebruikt kan worden. Ik heb me laten adviseren door enkele ervaren onderwijzeressen, vooral wat de volgorde van de tafels betreft.

Motivering: Met domweg van buiten leren, inpompen, leren de kinderen de tafels tenslotte ook wel. Vrijwel alle rekenmethoden maken de tafel wel concreet, maar door de kuikentjes, huisjes en boompjes, zien sommige kinderen het bos i.c. de tafel niet meer. Door een schematische voorstelling, die met één oogopslag te overzien is, wordt in dit werkje elke nieuwe tafel aangeboden. Natuurlijk moeten de tafels van buiten geleerd worden, als het kind dan maar weet wat het aan het doen is. Bij de verwerking wordt behoorlijk 'getraind', maar ook wordt er steeds weer een beroep gedaan op het inzicht van de leerlingen. Bovendien wordt er (bijna ongemerkt) aandacht geschonken aan de correlatie van de verschillende tafels. (bijvoorbeeld wanneer ontdekt wordt dat 3×4 hetzelfde is als 4×3 en dat bij gebruik van het honderdveld de antwoorden van de verschillende tafels soms in een zelfde hokje of cirkeltje komen te staan.)

In het tweede deeltje (voor groep 5) komt dit nog meer tot zijn recht.

Er is steeds weer gezorgd voor de zo broodnodige herhaling, zodat niet als de laatste tafel 'er in' zit, de eerste weer vergeten is.

Overgens moet er natuurlijk elke dag mondeling herhaald worden.

Werkwijze: Elke tafel moet eerst goed bekeken worden. Er wordt samen geteld en gecontroleerd of de antwoorden wel kloppen. Daarna goed van buiten leren. In het begin met de tafel voor zich. Daarna de antwoorden bedekken met een strook papier. Later de tafel + antwoorden bedekken, alleen de figuurtjes zijn nog zichtbaar. Als de tafel er goed in zit, pas omslaan en met de opdrachten beginnen. Het is de bedoeling dat de antwoorden ingevuld worden in deze werkboeken.

$1 \times 10 = 10$

$2 \times 10 = 20$

$3 \times 10 = 30$

$4 \times 10 = 40$
